

Dr. Monideep Dey US to Sichuan Fire Research Institute Ministry of Public Security to carry out fire safety engineering lectures and exchange

Publisher: The Science and Technology Department of Sichuan Published: 2015-06-11

To further enhance the Ministry of Public Security of Sichuan Fire Research Institute research capabilities in the field of fire safety engineering, strengthen my technical exchanges and international cooperation with the Ministry of Public Security Fire Department agreed, ISO / TC92 / SC4 / WG7 convener invited Dr. Monideep Dey I came, 2015 May 27 to 28, held a two-day special building fire safety design and assessment methods lectures and seminars. During the meeting, Lu Jian, deputy director of the country and I studied art design applications on the fire safety problems and and application Monideep Dr. Dey overseas research and conducted in-depth exchanges and discussions.

Monideep Dr. Dey from the standard design of fire safety to be followed, standardized start, through analysis of specific cases, explained in detail the procedures and specific requirements for special building fire safety design and focused on the selection of design fire scenarios, the calculation methods and models verification, follow-up inspection and life-cycle management and so on fire. In the exchange process, Dr. Monideep Dey also emphasized the importance of computer programs and key input parameters to carry out experimental verification.

Through this seminar and exchange, my research staff related points of special building fire safety design and evaluation have a clearer understanding and mastery of the relevant test further research and engineering applications has important significance.
