RE: Monideep Dey, PhD
President, Deytec, Inc., USA
139 N. Loudoun St., Suite 1, Winchester, Virginia 22601, USA

Dear Sir/Madam

I have known Dr. Monideep Dey since he joined with us to ISO/SC4 (Fire Safety Engineering), 2011. He has quickly become to be a most important member of SC4 with his fresh and valuable inputs to the ongoing works by every WG in SC4.

As the convener of WG1 (General Principle and Performance Concepts), I must thank Dr. Dey more than anybody else in SC4 for that he has volunteered to be the project leader for the revision work of ISO 23932 (Fire Safety - General Principles), transferring the ISO-TR 13387 series, etc., which has been a great help for WG1 works. Analyzing such numerous documents and making positive proposals for the improvement of SC4 documents would have been very difficult without his outstanding technical expertise and experience and admirable diligence.

Dr. Dey has now been assigned to the convener of WG7 (Assessment, Verification and Validation of Calculation Method), with unanimous approval in SC4. I expect his new assignment will enhance the activity and quality of not only of WG7 works but also of SC4 works in general.

Yours sincerely,

田中 尊義

Takeyoshi Tanaka, Dr. of Engineering
Emeritus Professor (Retired) of Kyoto University
Fellow, Society of Fire Protection Engineers
President of Japan Association for Fire Science and Engineering
