## Dear Sir/Madam:

Dr. Monideep Dey is very active in the activities of ISO TC92/SC4. I first met him in 2011 when he joined us as the representative of ANSI, USA. From his presentations at the meetings of SC4, we know that he not only has carefully studied almost all the documents of SC4, but also has integrated his own understanding and insights into them. His outstanding expertise and experience in fire safety engineering won him convenor of SC4/WG 7 in April of 2014.

As convenor of WG 7, he vigorously leads his team to start the revision of IS 16730-1. At the same time, he volunteered to be the project leader for the revision of IS 23932 "FSE –General Principles". His efforts and diligence will certainly help to improve the worldwide understanding of the procedures and practice of fire safety engineering.

Zhaopeng Ni

Head of Code and Standard Department
